BANH TUAN KIET

.NET Developer Intern

https://github.com/BanhTuanKiet - banhtuankiet2908@gmail.com - 0948442994 - Tan Binh District

SKILLS

Programming Languages:	C#, JavaScript, TypeScript.
Libraries/Frameworks:	ASP.NET Core, EF Core, ReactJS, NextJS, ExpressJS, Bootstrap, TailwindCSS.
Databases:	SQL (MySQL, SQL Server), NoSQL (MongoDB).
Tools:	Redis, Git, Postman, Firebase, Render, Google Cloud, Cloudinary.

EDUCATIONS

Ho Chi Minh University Of Technology (HUTECH)   **Sep 2022 - Sep 2026**

Major:	Information Of Technology - Software Engineering.
Grade Point Average:	3.48/4.0

Toeic Certificate - Listening & Reading   **Feb 2025 - Feb 2027**

Score:	655/990

PROJECTS

Project Management (Team size: 3)   **Sep 2025 - Now**

- Github: https://github.com/BanhTuanKiet/ProjectManagement
- Technologies: **ASP.Net Core, EF Core, NextJS, TailwindCSS, SQL Server, Render, Firebase, Google Cloud, SignalR, Cloudinary.**
- Role: Developed RESTful APIs, implemented authentication/authorization with custom role-based middleware, built centralized error-handling middleware, and integrated real-time notifications, online status, and user activity tracking using SignalR. Designed responsive UI for project and task collaboration features.
- Description: A real-time agile project management system featuring backlog, sprint, and task tracking capabilities. It supports team collaboration, dynamic role-based access control, online presence, and instant notifications for seamless and efficient project execution.

Clinic Management (Team size: 3)   **Mar - May 2025**

- Github: https://github.com/BanhTuanKiet/BookingCare
- Technologies: **ReactJS, Bootstrap, ASP.Net, EF Core, SQL Server, Google Cloud.**
- Role: Built RESTful APIs (user, scheduling, medical records), implemented JWT authentication with role-based access, developed error-handling middleware, and created UI for booking and patient records.
- Description: A web application developed to streamline clinic operations. The system supports efficient management of patient records, appointment bookings, medical examinations, and payment processing.

- Github**:** https://github.com/BanhTuanKiet/E-Commerce

- Technologies**:** ReactJS, Bootstrap, ExpressJS, MongoDB, Redis, Firebase, Render.

- Description**:** A web application that streamlines eCommerce operations, enabling management of products, orders, inventory, reviews, and payments, while allowing customers to browse, order, and track purchases. Features JWTbased authentication with role-based access, plus search, filtering, and pagination for product browsing
